

Contents of volume 13

No. 1: pp 1–58 published January 2000
 No. 2: pp 59–126 published April 2000
 No. 3: pp 127–186 published July 2000
 No. 4: pp 187–246 published November 2000

Aguilera MK, Chen W, Toueg S: Failure detection and consensus in the crash-recovery model 99

Bazzi RA: Synchronous Byzantine quorum systems 45

Chen W → Aguilera MK 99

Datta AK, Johnen C, Petit F, Villain V: Self-stabilizing depth-first token circulation in arbitrary rooted networks 207

Feige U, Krauthgamer R: Networks on which hot-potato routing does not livelock 53

Hadzilacos V → Lo W-K 219

Halpern JY: A note on knowledge-based programs and specifications 145

Havlicek J: Computable obstructions to wait-free computability 59

Hélary J-M, Mostefaoui A, Netzer RHB, Raynal M: Communication-based prevention of useless checkpoints in distributed computations 29

Herman T: Superstabilizing mutual exclusion 1

Johnen C → Datta AK 207

Joung Y-J: Asynchronous group mutual exclusion 189

Krauthgamer R → Feige U 53

Lamport L: Fairness and hyperfairness 239

Lo W-K, Hadzilacos V: On the power of shared object types to implement one-resilient consensus 219

Lynch N → Pogosyants A 155

Malkhi D, Merritt M, Rodeh O: Secure reliable multicast protocols in a WAN 19

Manduchi G, Moro M: Automatic verification for a class of distributed systems 127

Merritt M → Malkhi D 19

Moro M → Manduchi G 127

Mostefaoui A → Hélary J-M 29

Netzer RHB → Hélary J-M 29

Petit F → Datta AK 207

Pogosyants A, Segala R, Lynch N: Verification of the randomized consensus algorithm of Aspnes and Herlihy: a case study 155

Raynal M → Hélary J-M 29

Rodeh O → Malkhi D 19

Schneider FB: Editorial 187

Segala R → Pogosyants A 155

Stoller SD: Detecting global predicates in distributed systems with clocks 85

Toueg S → Aguilera MK 99

Villain V → Datta AK 207
